CodSoft(web development)

PROJECTS

- **Portfolio - using HTML and CSS**

Created a responsive portfolio using HTML and CSS, showcasing technical skills and projects. Implemented modern CSS techniques for an optimized user experience across all devices.

- **Calculator -- using HTML, CSS and JavaScript**

Developed an interactive calculator using HTML, CSS, and JavaScript, demonstrating strong problem-solving and programming skills. Implemented features for basic arithmetic operations, ensuring a responsive and user-friendly interface. Utilized event handling and DOM manipulation for dynamic functionality.

- **Quiz maker- using HTML, CSS and JavaScript**

Designed and developed a dynamic quiz maker using HTML, CSS, and JavaScript, allowing users to create, edit, and take quizzes. Implemented features such as multiple question types, score calculation, and real-time feedback. Ensured a responsive design for seamless use on various devices. Leveraged local storage to save quiz data for persistent user experience.
